

NAEEM TALEGHANI

FRONT-END DEVELOPER

+98 938 736 6221 · naemtaleghani.8@gmail.com · www.naemtaleghani.ir · github.com/naemt8 · Iran, Karaj

Computer Science student and aspiring Front-End Developer with over one year of continuous hands-on learning and experience building web applications. My primary focus is React and its ecosystem, and I have also worked with JavaScript, TypeScript, Tailwind CSS, and Git. I enjoy collaborating with teams, learning new technologies, and solving web development challenges. I am currently seeking an opportunity to contribute to a professional development team while expanding my skills and growing as a React Front-End Developer.

PROJECTS

weather website

Developed a weather website using the OpenWeather API to retrieve and display real-time weather information based on the user's selected city. This project focused on consuming REST APIs, processing API responses, and dynamically rendering weather data within the user interface. It provided valuable hands-on experience in API integration, data handling, and ensuring accurate presentation of the retrieved information.

dictionary website

Developed a dictionary website that allows users to search for English words using a public API, providing definitions, pronunciations, example sentences, and audio pronunciation when available. The project focused on integrating and consuming REST APIs, managing asynchronous data, and presenting the retrieved information through a dynamic and user-friendly interface. It also provided valuable experience in handling API responses, managing error states, and dealing with cases where no search results were returned.
